INSTALLED MAX LENGTH:	565mm

The Diplomat Wall Hung Pan is a pan for the concealed cistern.

DIPLOMAT WALL HUNG PAN INSTALLATION GUIDE:

1. Use frame supplied with box. Adjust sliding pedestal to the correct height: Centre of outlet 230mm from the floor, 332mm for the anchor bolts from concrete floor, and 368mm from floor to inlet water supply. Once adjustments made tighten bolts. Frame ready to be installed into wall and floor.
2. Installation of metal frame: chase the metal frame into the wall and floor. Inlet and outlet pipes are to be installed, secured and tested. Once all adjustments have been made you can finish plastering. First wait for plaster to harden completely before installation of pan.
3. Once wall is plastered or tiled, you will have the Outlet pipe, Inlet pipe and fixation slots exposed. Plaster has to set before application of pan. Height of Outlet pipe 230mm from center to floor, Inlet pipe 368 mm from center to floor and fixation slots 332 mm from floor to center. Bolt 45mm from wall & bullet 95mm.
4. Finish plastered wall with tiles. The anchoring bolts are protruding from the wall by 45mm. Attach bullets to bolts to protrude by a total of 95mm from the wall with bullet slots facing outwards. Now fit Diplomat pan.
5. Installation of Pan ONLY. PLEASE NOTE: THE FASTENING FACILITIES TO TIGHTEN THE PAN FROM THE SIDE HOLES IS ALREADY FITTED TO THE PAN. Fit Diplomat pan to wall, align the back of the pan with the anchoring bolts and outlet, tighten firmly through the side holes of the pan with an allen-key, and then close side holes with plastic plug inserts.
6. Fit seat cover firmly from the top onto the pan with a screwdriver. PLEASE NOTE: THE FASTENING FACILITIES TO TIGHTEN THE SEAT COVER, FROM THE TOP, IS ALREADY FITTED TO THE PAN.
